

SCOTT OKAMOTO

BACKEND-FOCUSED FULL-STACK DEVELOPER

Clermont, FL • (352) 449-0037 • swokamoto@gmail.com

scott-portfolio-azure.vercel.app • github.com/swokamoto

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Go, SQL

Frameworks & Libraries: Node.js, Express, HTMX, Nunjucks, Drizzle ORM, React, Astro

Databases & Tools: PostgreSQL, SQLite, MongoDB, Git, Docker, Fly.io, Stripe, Discord SDK

PROJECTS

Marches

TypeScript • Node.js • PostgreSQL • HTMX • marches.fly.dev

Campaign management platform for West Marches tabletop RPGs with persistent world state, role-based permissions, and expedition conflict detection.

- Designed a 22-table PostgreSQL schema with self-referential location hierarchies and campaign-scoped data isolation
- Implemented role-based access control (Admin, GM, Player, Observer) enforced centrally at the middleware layer
- Built pre-commit expedition conflict detection, server-rendered HTMX workflows, and integration tests against a live database

Relay RPG

Node.js • Express • SQLite • Discord SDK • github.com/swokamoto/relay-rpg

Multiplayer Discord RPG with server-authoritative game logic, persistent characters, and turn-based collaborative gameplay.

- Designed SQLite schema for persistent character state, quest progression, and multi-server player data
- Built server-side state machine for turn management, dice mechanics, and character progression
- Deployed to Fly.io with concurrent gameplay running across multiple Discord servers

Isabelle's Bead Shop

React • Node.js • MongoDB • Stripe • isabellesbeadshop.onrender.com

Full-stack e-commerce platform with inventory management, customer reviews, and Stripe checkout.

- Built RESTful APIs supporting product catalog, customer review, and checkout workflows
- Developed admin dashboard for inventory and order management with role-gated access
- Integrated Stripe payment processing with order tracking and customer-facing checkout flow

EXPERIENCE

Software Development Intern

Columbus State University • 2023

- Contributed to internal applications supporting inventory tracking and shuttle operations
- Wrote SQL queries and Bash scripts to improve reporting and reduce manual processes

Helicopter Crew Chief

United States Air Force • 2005–2015

- Led maintenance teams responsible for mission-ready aircraft in high-pressure operational environments
- Coordinated structured troubleshooting and enforced compliance with strict technical standards

EDUCATION

B.S. Information Technology • Columbus State University

2023

Full-Stack Web Development Certificate • University of Central Florida

2024
